Washington, D.C. | 434-249-9335 | jtfragale@gmail.com

Web Developer and Psychometrist with a passion for finding creative ways to solve problems. Experience in full stack web development with a portfolio of individual and group projects. I enjoy working in a team and believe collaboration leads to the best possible outcomes.

Experience

General Assembly

Web Development Immersive Jan 2018 - Apr 2108

- Completed a 3-month, full-time web development program
- Learned the latest front-end and backend programming languages, tools, and methodologies
- Developed a portfolio of individual and collaborative projects utilizing skills learned throughout the course, which included building full-stack web applications

National Institutes of Health

Psychometrician/Coordinator Jun 2016- Jan 2018

- Performed clinical and research neuropsychological testing of medically ill and healthy research patients
- Administered, scored and summarized results for a range of neuropsychological, intellectual and psychological assessment instruments
- Trained and monitored the quality of test administration/scoring of graduate students and research assistants; documented training
- Organized and maintained databases related to protocols
- Collaborated with staff on research activities and performed preliminary analysis on data
- Acted as the coordinator for the neuropsychological consult service lab

University of Virginia

Neuropsychometrician Jun 2013 - Jun 2016

- Administered and scored neuropsychological tests to assess cognitive and neuropsychiatric functioning
- Managed a variety of patients, including those with epilepsy, dementia, Alzheimer's disease, Parkinson's disease, Multiple Sclerosis and patients with a history of strokes
- Optimized administration of tests by assessing and responding to patient's affect, concentration, work habits, problem solving and effort
- Trained and mentored new psychometrists

Standard and Poor's

Editor Associate Mar 2007- May 2009

- Researched and communicated with corporations and institutions regarding employee benefits programs
- Ensured benefits programs were in compliance with the Employee Retirement Act
- Maintained database using Oracle
